# LIST OF CONTENTS

VOLUME 26, NUMBER 1 1988

## *Contents*

*Original Contributions*

| | | |
|---|---|---|
| **J. Choma, M. Jaroniec** and **J. Piotrowska** | 1 | Distribution functions characterizing structural heterogeneity of activated carbons |
| **J. J. Freeman, F. G. R. Gimblett, R. A. Roberts** and **K. S. W. Sing** | 7 | Studies of activated charcoal cloth. III. Mesopore development induced by phosphate impregnants |
| **L. M. Manocha** and **O. P. Bahl** | 13 | Influence of carbon fiber type and weave pattern on the development of 2D carbon–carbon composites |
| **A. Kavanagh** and **R. Schlögl** | 23 | The morphology of some natural and synthetic graphites |
| **L. L. Murrell, C. T. Ratcliffe, W. J. M. Pieters, L. G. Sherman, N. C. Dispenziere, Jr.** and **A. F. Venero** | 33 | Narrow pore distribution formed in steam and $CO_2$ gasified cokes of different origin |
| **M. B. Cerfontain, F. Kapteijn** and **J. A. Moulijn** | 41 | Characterization of alkali carbonate catalysts for carbon gasification with $^{18}O$ labeled $CO_2$ |
| **Isao Mochida, Takashi Oyama** and **Yozo Korai** | 49 | Formation scheme of needle coke from FCC-decant oil |
| **Isao Mochida, Takashi Oyama** and **Yozo Korai** | 57 | Improvements to needle-coke quality by pressure reductions from a tube reactor |
| **Farida Benissad, Patrice Gadelle, Michel Coulon** and **Lucien Bonnetain** | 61 | Formation de fibres de carbone a partir du methane: I Croissance catalytique et epaississement pyrolytique |
| **J. S. Hayward, Bryan Ellis** and **B. Rand** | 71 | Characterization of pyrolysis products of pitch materials by broad line proton NMR spectroscopy and thermogravimetry |
| **Klaus J. Hüttinger** | 79 | Mechanism of water vapor gasification at high hydrogen levels |
| **Thomas Panagiotidis, Ekkehard Richter** and **Harald Jüntgen** | 89 | Structural changes of an anthracite char during the reaction with sulphur dioxide |

*Letters to the Editor*

| | | |
|---|---|---|
| **M. M. Dubinin** | 97 | On methods for estimating micropore parameters of carbon adsorbents |
| **R. Forsythe, R. Madey, D. Rothstein and M. Jaroniec** | 98 | Adsorption of acetone on activated carbon |
| **X. Bourrat, A. Oberlin, H. Van Damme, C. Gateau and R. Bachelar** | 100 | Mass fractal analysis of conducting carbon black morphology |
| **Y. X. Zhao and I. L. Spain** | 103 | The value of the elastic constants $C_{13}$ and $S_{13}$ of graphite |
| **N. Akuzawa, S. Kawahara, H. Sakuno, T. Amemiya and Y. Takahashi** | 104 | Absorption of ammonia by stage 1 alkali metal graphite intercalation compounds |
| **M. Jaroniec and R. Madey** | 107 | Physical interpretation of the energy parameter in the Dubinin–Raduskevich equation |
| **P. B. J. Bragoli, D. P. Almond and B. McEnaney** | 108 | Ultrasonic attenuation in graphite |
| | I | New Patents and Published Patent Applications from the United States and Over 30 Other Countries |
| | III | Software Survey Section<br>Neighbours of Carbon Atom in Graphite<br>Thomas–Fermi Potential for Carbon<br>Carbon Self-Consistent Potential<br>Carbon Atomic Orbitals |

VOLUME 26, NUMBER 2 1988

## *Contents*

*Original Contributions*

| | | |
|---|---|---|
| **M. Rozwadowski and R. Wojsz** | 111 | Porous texture of active carbons |
| **F. D. Kopinke, G. Zimmermann and S. Nowak** | 117 | On the mechanism of coke formation in steam cracking—Conclusions from results obtained by tracer experiments |
| **I. I. Mustafaev, M. A. Gurbanov and H. M. Hajiev** | 125 | Gasification of different types of carbon in steam and carbon dioxide in the presence of γ-radiation |

| | | |
|---|---|---|
| **S. Sampath, N. K. Kulkarni, M. S. Subramanian and N. C. Jayadevan** | 129 | Effect of lanthanum, neodymium, thorium, uranium, and plutonium compounds on graphite oxidation |
| **H. Honda** | 139 | Carbonaceous meophase: History and prospects |
| **K. Y. Sohn, S.-M. Oh and J.-Y. Lee** | 157 | Failure behavior of carbon/carbon composites prepared by chemical vapor deposition |
| **S. R. Brandtzæg and H. A. Oye** | 163 | A possible mechanism of sulphur-induced graphitization |
| **M. Inagaki, M. Washiyama and M. Sakai** | 169 | Production of carbon spherules and their graphitization |
| **P. R. Roberge, R. Beaudoin and J.-F. Berthiaume** | 173 | Fabrication and characterization of an activated carbon for electrochemical applications |
| **J. Zawadzki** | 183 | Infrared studies on the adsorption of *n*-butylamine on carbon films |
| **A. S. Kotosonov** | 189 | *g*-Factor of current carriers in pyrolytic carbons with quasi-two-dimensional graphite structure |
| **P. L. Antonucci, F. Romeo, M. Minutoli, E. Alderucci and N. Giordano** | 197 | Electrochemical corrosion behavior of carbon black in phosphoric acid |
| **M. A. Bañares-Muñoz, L. V. Flores González and J. M. Martín Llorente** | 205 | Determination of porosity and thermodynamic functions of adsorption on an "Agot" grade nuclear graphite |
| **T. Nakajima, B. Chang, T. Fujiwara and N. Watanabe** | 213 | Electrical resistivity of fluorine-based intercalation compounds of graphite fiber in low temperature region |
| **K. L. Luthra** | 217 | Oxidation of carbon/carbon composites—A theoretical analysis |
| **E. Yasuda, Y. Tanabe, L. M. Manocha and S. Kimura** | 225 | Matrix modification by graphite powder additives in carbon fiber/carbon composite with thermosetting resin precursor as a matrix |
| **A. G. Fitzgerald, M. Simpson, G. A. Dederski, P. A. Moir, A. Matthews and D. Tither** | 229 | Triode technology in the sputter deposition of carbon films |
| **L. Kavan, F. P. Dousek, K. Micka and J. Weber** | 235 | Electronic resistivity of carbon in the product of electrochemical reduction of Poly(tetrafluoroethylene), I |

**L. Kavan, F. P. Dousek, K. Micka and J. Weber** 245 Electronic resistivity of carbon in the product of electrochemical reduction of poly(tetrafluoroethylene), II. Theoretical considerations

**P. Magne and N. Dupont-Pavlovsky** 249 Graphite–ozone surface complexes

*Book Review*

**R. G. Jenkins** 257 *Adsorption Processes for Water Treatment* by Samuel D. Faust and Osman M. Aly

*Letter to the Editor*

**A. N. Chuvyrov, Y. A. Lebedev and V. M. Cornilov** 259 New liquid crystalline phase of petroleum pitches

I New Patents and Published Patent Applications from the United States and Over 30 Countries

V Software Survey Section

---

VOLUME 26, NUMBER 3 1988

*Contents*

**Peter A. Thrower** 263 Editorial

265 In Memoriam: J. Gilbert Hooley

266 Editorial Announcement

*Review Article*

**Brian McEnaney** 267 Adsorption and structure in microporous carbons

*Regular Articles*

**P. Le Cloirec, G. Martin and J. Gallier** 275 $^1$H NMR investigation on phenol saturated and unsaturated activated carbon: Quantification and exchange behavior of protons

**Philippe Lagrange and Asmaâ Bendriss-Rerhrhaye** 283 Etude de l'insertion dans le graphite des alliages binaires K-Bi, Rb-Bi, et Cs-Bi

**Y-X. Zhao, C. W. Bowers and I. L. Spain** 291 Graphitic nature of chemical vapor-deposited carbon filaments grown on silicon surfaces from acetylene

**R. B. Mathur, O. P. Bahl, V. K. Matta and K. C. Nagpal** 295 Modification of PAN precursors—Its influence on the reaction kinetics

**M. Washiyama, M. Sakai and M. Inagaki** 303 Formation of carbon spherules by pressure carbonization—Relation to molecular structure of precursor

| | | |
|---|---|---|
| **R. Dziembaj, A. Baranski, J. M. Kagan, J. Malczyk** and **K. Pawlowski** | 309 | Oxygen corrosion of calcined cokes: I. Isothermal kinetics and texture variation |
| **Chanel Ishizaki, Kozo Ishizaki** and **Mitsuo Ogura** | 317 | An analytical electron microscopy study of a commercial activated carbon |
| **K. Kaneko, Y. Nakahigashi** and **K. Nagata** | 327 | Microporosity and adsorption characteristics against NO, $SO_2$, and $NH_3$ of pitch-based activated carbon fibers |
| **Lalit M. Manocha, Eiichi Yasuda, Yasuhiro Tanabe** and **Shiushichi Kimura** | 333 | Effect of carbon fiber surface treatment on mechanical properties of C/C composites |
| **D. Cottinet, P. Couderc, J. L. Saint Romain** and **P. Dhamelincourt** | 339 | Raman microprobe study of heat-treated pitches |
| **R. J. Keddy, T. L. Nam** and **R. C. Burns** | 345 | The detection of ionizing radiations by natural and synthetic diamond crystals and their applications as dosimeters in biological environments |
| **T. Nakajima, A. Mabuchi** and **R. Hagiwara** | 357 | A new structure model of graphite oxide |
| **M. A. Ferro-García, J. Rivera-Utrilla, J. Rodríguez-Gordillo** and **I. Bautista-Toledo** | 363 | Adsorption of zinc, cadmium, and copper on activated carbons obtained from agricultural by-products |
| **Yang Duk Park, Isao Mochida** and **Tadayuki Matsumoto** | 375 | Extractive stabilization of mesophase pitch fiber |
| **James R. Gaier, Melissa E. Slabe** and **Nanette Shaffer** | 381 | Stability of the electrical resistivity of bromine, iodine monochloride, copper(II) chloride, and nickel(II) chloride intercalated pitch-based graphite fibers |
| **I. Takahagi** and **A. Ishitani** | 389 | XPS study on the surface structure of carbon fibers using chemical modification and C1s line shape analysis |
| **T. Nakajima, T. Ino, N. Watanabe** and **H. Takenaka** | 397 | Preparation, structure, and electrical conductivity of fluorine–graphite intercalated compound |
| **Dale Grove, P. Desai** and **A. S. Abhiraman** | 403 | Exploratory experiments in the conversion of plasticized melt spun PAN-based precursors to carbon fibers |
| | | *Editorial Section* |
| | 413 | Carbon Calendar |
| | 415 | Editorial Announcements |

I New Patents and Published Patent Applications from the United States and Over 30 Countries

VII Software Survey Section

VOLUME 26, NUMBER 4 1988

*Contents*

**P. A. Thrower** i Editorial Announcement

**T. Tsuzuku** iii Obituary: Hideo Akamatu

*Regular Articles*

**A. Guerrero-Ruiz, I. Rodriguez-Ramos, F. Rodriguez-Reinoso, C. Moreno-Castilla,** and **J. D. López-González** 417 The role of nitrogen and oxygen surface groups in the behavior of carbon-supported iron and ruthenium catalysts

**Farida Benissad, Patrice Gadelle, Michel Coulon,** and **Lucien Bonnetain** 425 Formation de fibres de carbone a partir du methane II: Germination du carbone et fusion des particules catalytiques

**R. H. Hurt, D. R. Dudek, J. P. Longwell,** and **A. F. Sarofim** 433 The phenomenon of gasification-induced carbon densification and its influence on pore structure evolution

**L. Bruce Adams, C. Richard Hall, Richard J. Holmes,** and **Richard A. Newton** 451 An examination of how exposure to humid air can result in changes in the adsorption properties of activated carbons

**S. Banerji, S. K. Adhya,** and **S. K. Ghosh** 461 ESR studies of carbon containing finely dispersed iron

**S. Sato, K. Kawamata, A. Kurumada, M. Kawamata,** and **R. Ishida** 465 A rationalization of the graphitizing heat treatment process of carbon

**Klaus J. Hüttinger** 477 Coke yield in liquid-phase pyrolysis of hydrocarbons from the standpoint of chemical reaction engineering science

**W. P. Hoffman, F. J. Vastola,** and **P. L. Walker, Jr.** 485 Pyrolysis of propylene over carbon active sites II. Pyrolysis products

**J. J. Freeman** and **F. G. R. Gimblett** 501 Studies of activated charcoal cloth. IV. Influence of phosphate impregnants on the rate of activation in carbon dioxide gas

**B. Marchon, J. Carrazza, H. Heinemann,** and **G. A. Somorjai** 507 TPD and XPS studies of $O_2$, $CO_2$, and $H_2O$ adsorption on clean polycrystalline graphite

| | | |
|---|---|---|
| **M. M. Dubinin, R. Sh. Vartapetian, A. M. Voloshchuk, J. Kärger,** and **H. Pfeifer** | 515 | NMR study of translational mobility of molecules adsorbed on active carbons |
| **S. Mrozowski** | 521 | ESR studies of carbonization and coalification processes part I: Carbonaceous compounds |
| **S. Mrozowski** | 531 | ESR studies of carbonization and coalification processes part II: Biological materials |
| **C. Z. Hu, L. Feng,** and **J. D. Andrade** | 543 | Surface structure of pyrolyzed polyimide |
| **A. G. Fitzgerald, M. Simpson, G. A. Dederski, B. E. Storey, P. A. Moir,** and **D. Tither** | 547 | Carbon films produced by fast atom bombardment |
| **A. M. Vassallo** and **R. Codd** | 553 | Pyrolysis and mesophase formation from sucrose |
| **Donald G. Howard** | 559 | Mossbauer study of cobalt ions adsorbed from solution onto activated charcoal |
| **Gen Katagiri, Hideyuki Ishida,** and **Akira Ishitani** | 565 | Raman spectra of graphite edge planes |
| **Naohiro Sonobe, Takashi Kyotani,** and **Akira Tomita** | 573 | Carbonization of polyacrylonitrile in a two-dimensional space between montmorillonite lamellae |
| **J. E. Zimmer** and **R. L. Weitz** | 579 | Magnetic field alignment of the matrix in a carbon–carbon composite |
| | | *Letters to the Editor* |
| **J. J. Freeman** and **F. G. R. Gimblett** | 589 | Activation of phosphate-impregnated charcoal cloths in carbon dioxide gas at 850°C. A curious anomaly |
| **M. Alam, T. DebRoy** and **R. Roy** | 591 | Separation of synthetic diamond from carbon black by oxidation |
| **E. Fitzer** and **F. Rozploch** | 594 | Laser Raman spectroscopy for determination of the C–C bonding length in carbon |
| **M. Kodama, T. Fujirua, K. Esumi, K. Meguro** and **H. Honda** | 595 | Preparation of meso-carbon microbeads with a narrow size distribution |

VOLUME 26, NUMBER 5 1988

*Contents*

| | | |
|---|---|---|
| **Ian L. Spain** | i | Obituary: Alfred R. J. P. Ubbelohde |
| | | *Regular Articles* |
| **Jerzy Zawadzki** | 603 | Infrared studies of aromatic compounds adsorbed on the surface of carbon films |
| **J. M. Skowroński** | 613 | Unusual temperature dependence of the electrical resistance of compacted $CrO_3$ graphite intercalation compounds |
| **Jerzy Zawadzki** | 619 | IR study of the thermal degradation and oxidation of p-polyphenylene |
| **Jerzy Zawadzki** | 627 | An infrared study of acid sites on carbons by pyridine adsorption |
| **W. Metz** and **G. Schoppen** | 635 | Inhibition of the reaction and threshold pressures in the system $FeCl_3$-graphite |
| **P. Behrens, V. Woebs, K. Jopp,** and **W. Metz** | 641 | Synthesis and characterization of the graphite intercalation compounds of bismuth trichloride |
| **J. de D. Casquero-Ruiz, J. M. Guil, J. de D. López-González,** and **A. Ruiz-Paniego** | 647 | Study of the porous structure of active carbons by nitrogen adsorption and *n*-nonane preadsorption |
| **David Bennett, Andrew Gibson, John W. Patrick,** and **Alan Walker** | 653 | Fractographic studies of anode carbons |
| **D. W. McKee** | 659 | Oxidation behavior of matrix-inhibited carbon/carbon composites |
| **R. A. Greinke** and **L. S. Singer** | 665 | Constitution of coexisting phases in mesophase pitch during heat treatment: Mechanism of mesophase formation |
| **G. L. Collins, N. W. Thomas,** and **G. E. Williams** | 671 | Kinetic relationships between heat generation and nitrile consumption in the reaction of poly(acrylonitrile) in air at 265°C |
| **M. A. Bañares-Muñoz, J. M. Martín Llorente,** and **L. V. Flores González** | 681 | Textural study of a commercial pyrolytic graphite by physical adsorption of gases |
| **Slawomir Neffe** | 687 | Electrochemical corrosion of glasslike carbon in sulfuric acid solution |
| **William C. Forsman, Helen E. Mertwoy,** and **Dorothy E. Wessbecher** | 693 | Nonreductive, spontaneous deintercalation of graphite nitrate |

| | | |
|---|---|---|
| **J. F. Alder, P. R. Fielden, and S. J. Smith** | 701 | The adsorption of hydrogen cyanide by impregnated activated carbon cloth. Part I: Studies on cobalt and nickel acetates as impregnants for hydrogen cyanide removal |
| **J. F. Alder, P. R. Fielden, and S. J. Smith** | 713 | The adsorption of hydrogen cyanide by impregnated activated carbon cloth. Part II: Reactivity of impregnated metal carboxylates towards hydrogen cyanide |
| **Chor Wong** | 723 | Characterization of metal–soot systems by transmission electron microscopy |
| **A. S. Kotosonov** | 735 | *g*-Factor of current carriers in pyrolytic carbons with quasi-two-dimensional graphite structure |
| | | *Letters to the Editor* |
| **T. Suzuki and K. Kaneko** | 743 | Structural change of activated carbon fibers with desorption by in situ x-ray diffraction |
| **A. Charlier, D. Hnikich, and M.-F. Charlier** | 745 | Rayon des sphères et nombre di voisins pour le graphite |
| **M. Jaroniec and J. Choma** | 747 | Comparison of the adsorption isotherm equations associated with Gaussian and Gamma micropore-size distributions |
| **I. K. Ismail and M. D. Vangsness** | 749 | On the improvement of carbon fiber/matrix adhesion |
| **I. Mochida, S. Nakamo, T. Oyama, Y. Nesumi, and Y. Todo** | 751 | Puffing and CTE of carbon rods prepared from hydrodesulfurized petroleum needle coke |
| **W. P. Hoffman, V. B. Elings, and J. A. Gurley** | 754 | Scanning tunneling microscopy on carbon fibers |
| **I. C. Lewis and R. T. Lewis** | 757 | "Carbonaceous mesophase: History and prospects"—A reply |
| | | *Editorial Section* |
| | 759 | Carbon Calendar |
| | I | New Patents and Published Patent Applications from the United States and Over 30 Countries |

761 Awards Presented at the 18th Biennial Carbon Conference

*Regular Articles*

| | | |
|---|---|---|
| **Seh-Min Oh** and **Jai-Young Lee** | 763 | Structures of pyrolytic carbon matrices in carbon/carbon composites |
| **Seh-Min Oh** and **Jai-Young Lee** | 769 | Effects of matrix structure on mechanical properties of carbon/carbon composites |
| **Masaya Kodama, Kunio Esumi, Kenjiro Meguro** and **Hidemasa Honda** | 777 | Adsorption of human serum globulin on mesocarbon microbeads |
| **Philippe Lagrange** | 785 | Approche des mécanismes réactionnels mis en jeu au cours d'une insertion par stades dans le graphite |
| **N. Martín** and **S. Fuentes** | 795 | Characterization of palladium-graphite samples after gasification with oxygen |
| **Y. A. Shahab, A. A. Siddiq,** and **K. S. Tawfiq** | 801 | The synthesis of carbon–sulfur bulk compounds |
| **G. R. Heal** and **L. L. Mkayula** | 803 | The preparation of palladium metal catalysts supported on carbon Part I: Selection and treatment of the carbons |
| **G. R. Heal** and **L. L. Mkayula** | 815 | The preparation of palladium metal catalysts supported on carbon Part II: Deposition of palladium and metal area measurements |
| **T. Nakajima, K. Okahara D. K. Padma,** and **N. Watanabe** | 825 | Preparation and electrical conductivity of niobium fluoride-graphite intercalation compounds |
| **Tsuyoshi Nakajima, Takeo Matsui, Muneyuki Motoyama,** and **Yasuo Mizutani** | 831 | Preparation, structure, and electrical conductivity of vanadium fluoride-graphite intercalation compound |
| **T. Hamada, T. Nishida, M. Furuyama,** and **T. Tomioka** | 837 | Transverse structure of pitch fiber from coal tar mesophase pitch |
| **Isao Mochida, Kiyoyuki Shimizu, Yozo Korai, Hiroyuki Otsuka,** and **Susumu Fujiyama** | 843 | Structure and carbonization properties of pitches produced catalytically from aromatic hydrocarbons with $HF/BF_3$ |
| **S. Sato, M. Ishihara, K. Hirakawa, M. Kiyono,** and **Y. Inoue** | 853 | Optimum arrangement of coke grain size for electrode graphite as determined by thermal shock tests |

**Kenjiro Yamada** and **Shotaro Tobisawa** 867 Electron microscope study of carbon particles developed using a conically converging shock-wave technique

**Rajiv K. Agarwal** and **James A. Schwarz** 873 Analysis of high pressure adsorption of gases on activated carbon by potential theory

**J. J. Venter** and **M. A. Vannice** 889 Applicability of "drifts" for the characterization of carbon-supported metal catalysts and carbon surfaces

*Letters to the Editor*

**K. Kaneko** 903 Dynamic Hg(II) adsorption characterization of iron oxide-dispersed activated carbon fibers

**I. Rodriguez-Ramos** and **F. Rodriguez-Reinoso** 905 The adsorption of $N_2$ and $CO_2$ on PAN carbons

**L. B. Ebert, J. C. Scanlon,** and **L. A. Gebhard** 906 The intercalation of chromium trioxide into graphite from a 6 M $H_2SO_4$ solution

**S. Hamamda, V. P. Popov,** and **V. I. Khotkevitch** 908 Effect of pressure on the thermal expansion coefficient of pyrolytic graphite in the strong bonding direction in the temperature interval 5-300K

**E. J. Roche, J. G. Lavin,** and **R. G. Parrish** 911 The mosaic nature of the graphite sheet in pitch-based carbon fibers

**P. N. Krishnan, S. A. Katz, A. Birenzvige,** and **H. Salem** 914 The role of chromium in ASC whetlerite

**H. F. Stoeckli, M. Fragniere, S. Huguenin, M. Depraz,** and **L. Ballerini** 915 On the determination of the total surface area of carbons by the selective adsorption of caffeine from aqueous solutions

*Book Review*

**J. L. White** 917 *Polynuclear Aromatic Compounds* edited by Lawrence B. Ebert
